

## COUNTS AND SIZES OF KEY SPECIES IN DIFFERENT ZONES

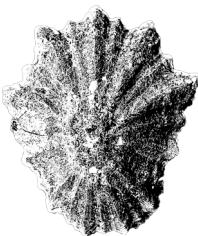

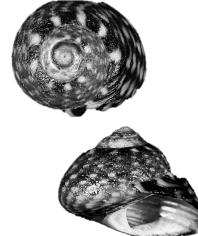

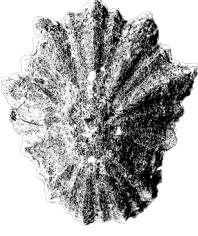

1. Fill in the date, transect number and your names:

SITE	Dalebrook (Kalk Bay)	OBSERVER name(s)	
DATE		SCRIBE name	
TRNSECT #		NOTES (if you have)	

2. In each zone, place your quadrat randomly, record the position of your quadrat, and score counts and lengths of key species:

<b>LOW zone</b>	<b>PEAR LIMPET</b> 	<b>COUNTS</b>					
	<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)						
<b>HIGH zone</b>	<b>LONG-SPINED LIMPET</b> 	<b>COUNTS</b>					
	<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)						

<b>MID zone</b>	<b>GOAT'S EYE LIMPET</b>	<b>COUNTS</b>					
		<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)					
<b>HIGH zone</b>	<b>VARIEGATED TOPSHELL</b>	<b>COUNTS</b>					
		<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)					
<b>HIGH zone</b>	<b>VULCANO BARNACLE</b>	<b>COUNTS</b>					
		<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)					
<b>HIGH zone</b>	<b>GOAT'S EYE LIMPET</b>	<b>COUNTS</b>					
		<b>SIZES in mm</b> (of 20 individuals, unless there are fewer)
